

Your World Is Now Full of Options.

The FUZE® ProLine Feeding System from VAL-CO® offers you the ability to do something you've never been able to do before... build your own feeding system.

Features for all FUZE ProLine Feeding Systems:

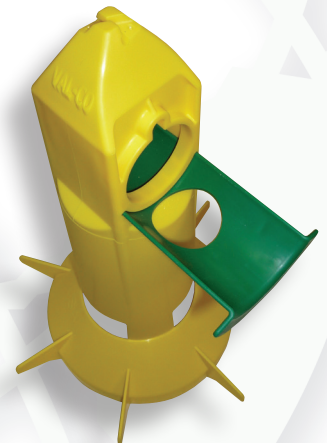

- Three large feed windows for automatic and even pan flooding with feed
- Grill and pan form a large feed saving lip to minimize feed spillage and waste.
- Accurate feed level adjustments are quickly made from outside the pan
- Deep center feeding "V" bottom nestles down into the litter to promote easier chick access when brooding and overall feed savings
- Increased material thickness added to the pans in the "scratch" areas to improve pan life
- Anti-rake fins reduce billing and feed wastage
- Constructed with engineered polymer resins to resist wear and reduce the harboring of bacteria
- Two-piece top for ease of installation/replacement or one piece tower for additional rigidity and strength
- A pan/grill hinge and lock that securely locks pan to grill and provides for easy cleaning between flocks
- A mechanical switch control pan which provides high reliability and ease of maintenance
- An optional end control unit bird attracting light – LED lights that emit wavelengths known to attract birds
- A slide shutoff is also available, allowing you to stop the feed supply to individual feeders without disrupting others on your line.

The LED light will attract your birds to the pans when it's feeding time.

Also available - the single piece tower provides additional rigidity and strength especially when feeding larger birds

The FUZE Shutoff is available on both the single piece (shown) and two piece towers.

The FUZE ProLine Feeders allow you to mix & match interchangeable components to "custom build" the feeder that is right for your particular live production needs.

- Choice of pan diameters: 13 or 14 inch diameters
- Choice of pan depth: shallow depth (2.4 in/61mm) or standard depth (3.0in/76mm)
- Choice of grill configurations: 13 spoke grills for 13 inch pans, and 14 spoke grills for 14 inch pans. Additionally there is a 5 spoke general purpose grill available for the 14 inch pans
- All grills are designed to provide generous spacing for today's breeds of birds; and easy in and out of the pan for brooding chicks
- Grills are designed to virtually eliminate trapping of chicks in the pan
- Integrated hinge & lock grill to pan attachment facilitates cleaning/disinfection

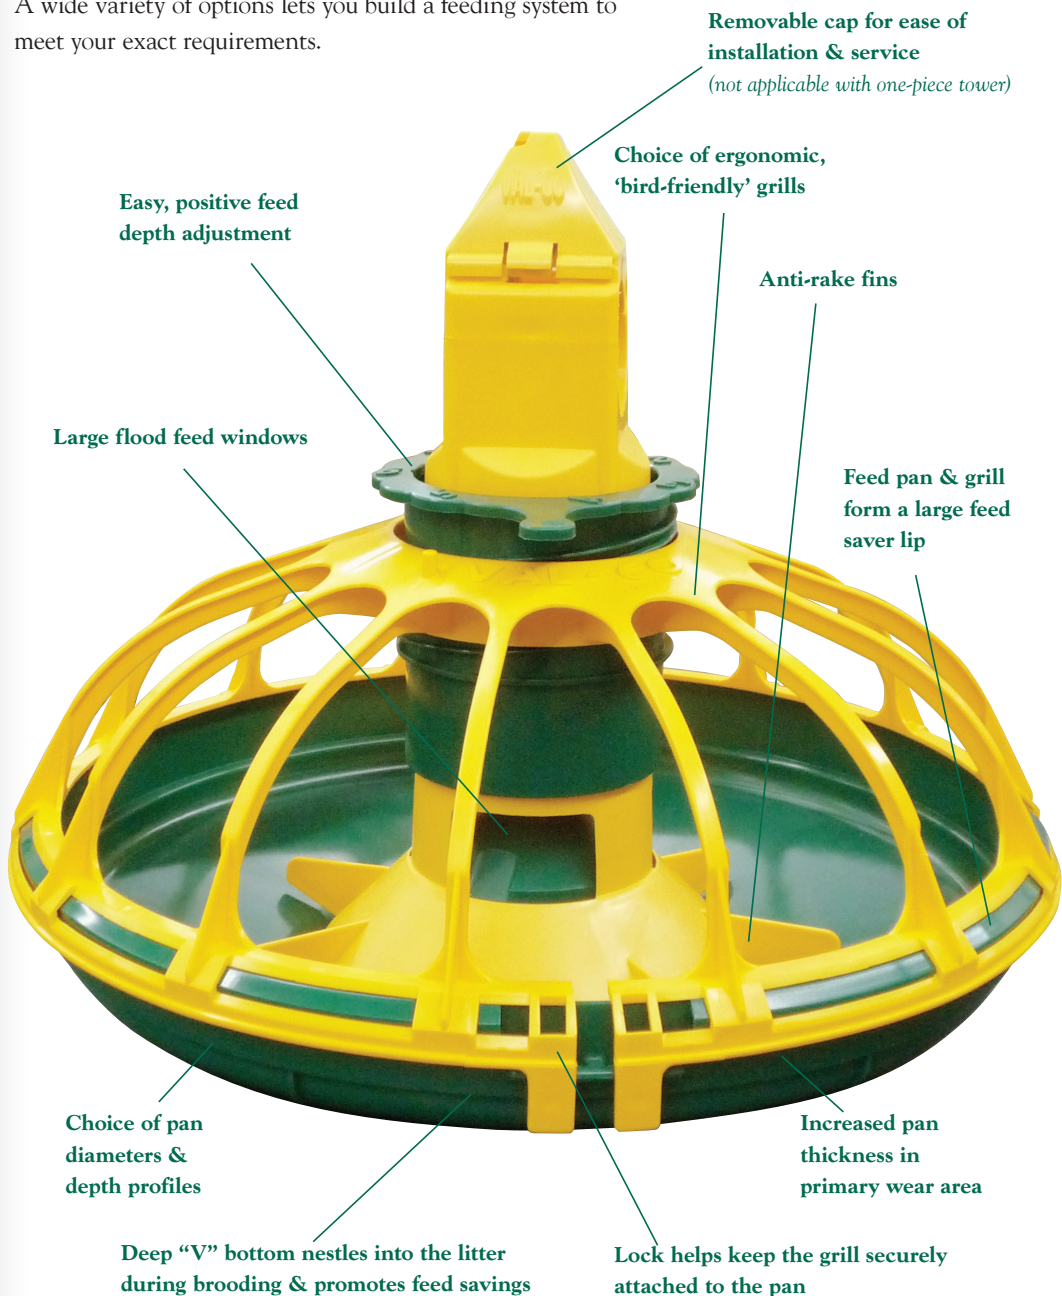

Performance You Can Count On
